OUR CONTRIBUTORS

Mr. Clapp is a consulting geologist specializing in petroleum. From 1902 to 1908 he was connected with the U. S. Geological Survey. In 1914, in association with others, he was engaged in the geological investigation of northern China. Among recent papers of his are: "The Ethics of the Petroleum Geologist" (*Econ. Geology*, Vol. 12, 1917) and "A Review of Present Knowledge Regarding the Petroleum Resources of South America" (*Amer. Inst. of Mining Engineers Bull.* No. 130, 1917). He contributed the article "Along and Across the Great Wall of China" to the *Geographical Review*, April-May-June, 1920.

Mr. Bishop knows the Far East well, having spent altogether 18 years there. In 1915 and 1917 he conducted archeological exploration in China for the Museum of the University of Pennsylvania. In 1918 he was ordered to Peking as Assistant Naval Attaché. Since his return to the United States in 1920 he has been engaged in compilation of data collected in the Far East and in study at the University of California and Columbia University, and is now acting as assistant in the Anthropological Department of the latter university.

Dr. Mather is professor of geology in Denison University. His work has been largely in the field of petroleum geology. In 1919-1920 he was engaged in reconnaissance work of this nature in Bolivia and Argentina.

Dr. Kindle is paleontologist in charge of invertebrate paleontology, Geological Survey of Canada. Previously to this appointment he was associated with the Geological Survey of the United States as geologist and paleontologist. Dr. Kindle recently carried out investigations in the Mackenzie River Basin. He has published two papers on this region in the *Geographical Review*, "Arrival and Departure of Winter Conditions in the Mackenzie River Basin" (December, 1920) and "Mackenzie River Driftwood" (January, 1921). His most recent work has been done in southeastern Labrador.

Dr. De Geer is chairman of the Geographical Institute of the University of Stockholm and lecturer in Economic Geography at the Commercial High School of that city. He is the author of several physiographic papers, but he is especially known for his writings on population distribution and city geography.

Professor Musset is professor of geography at the University of Rennes. His several writings on western France include an excellent monograph on Bas-Maine (1917).

Dr. Novakovsky, who is Polish by birth, is a graduate of the Kiev Commercial Institute where he also acted as assistant professor. He is one of the founders of the Geographical Institute in that city. On four occasions (1911, 1913, 1915, and 1917) he was sent by the former Russian government to Asia and Japan for scientific work. In 1921 he received the Ph.D. degree of Yale University. Dr. Novakovsky has lately been appointed special lecturer at Clark University.

Professor Ward, of Harvard University, is one of the foremost authorities on climate in this country. The present article is the eighth in a series appearing in the *Bulletin* and *Review* of the Society on various aspects of the climatology of the United States.

Dr. Huntington is research associate in geography at Yale University. He has especially studied the question of secular changes in climate and their influence on civilization. His numerous writings on this subject include "The Pulse of Asia" (1907); "Palestine and Its Transformation" (1911); "The Climatic Factor as Illustrated in Arid America" (*Carnegie Inst. Publ.* 192); "Civilization and Climate" (1915); "World Power and Evolution" (1919).
